**ATTACHMENT TO NOTICE OF ALLOWABILITY**

***Allowable Subject Matter***

Claims 2-5 and 7-18 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to Claim 17, the prior art of record teaches many of the elements of the claimed invention, including an apparatus for generating x-rays by irradiating a target with an electron beam, comprising: an electron gun operative for emitting electrons; an electron lens having a bore extending there through for receiving and converging the emitted electrons; translation means for translating said target in directions parallel to a surface thereof, the translation means disposed within the bore of the electron lens; a holder connected to the translation applying means and operative to hold the target within or adjacent to the bore; and a vacuum vessel operative for containing the electron gun, the electron lens, the translation applying means and the target in a vacuum.

However, prior art fails to teach or fairly suggest the apparatus wherein the translation means are vibration applying means, in that the translation means does not have reciprocating motion, and that the vibration applying means is connected to the electron lens, in the manner required by Claim 17.

Claims 2-5, 7-16, and 18 are allowed by virtue of their dependency upon Claim 17.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2882

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Response to Arguments***

Applicant's arguments, see Applicant Amendment, filed 27 April 2007, with respect to objections to Claims 7 and 13, and 35 USC 112, first paragraph, rejections of Claims 1-2, 11-13, and 15-16 have been fully considered and are persuasive. The objections to Claims 7 and 13, and 35 USC 112, first paragraph, rejections of Claims 1-2, 11-13, and 15-16 have been overcome by the amendment.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent Documents to: Ukita (US 6,377,660 B1) teaches translating an x-ray target to select a desired target material, but does not teach reciprocating motion (i.e., vibration) or any structure of the target holder means, and does not teach an electron lens.
